1  # =====
2  # BUG 1 - RUNTIME ERROR
3  # =====
4
5  # Type : IndexError
6
7  # Cause :
8  # Trying to access a list position that does not exist.
9
10 # Fix :
11 # Access only valid indexes inside the list.
12
13 # BUGGY CODE:
14
15 # marks = [80, 90, 70, 85, 95]
16 # print(marks[10])
17
18 # FIXED CODE:
19
20 # marks = [80, 90, 70, 85, 95]
21 # print(marks[4])
22
23
```

```
23
24 # =====
25 # BUG 2 - LOGICAL ERROR
26 # =====
27
28 # Type : Logical Error
29
30 # Cause :
31 # Average calculated using wrong divisor.
32
33 # Fix :
34 # Divide total by number of students.
35
36 # BUGGY CODE:
37
38 # marks = [80, 90, 70, 85, 95]
39 # total = sum(marks)
40 # average = total / 4
41 # print(average)
42
43 # FIXED CODE:
44
45 # marks = [80, 90, 70, 85, 95]
46 # total = sum(marks)
47 # average = total / 5
48 # print(average)
49
